WHY RED TELEPHONE BOOTHS?

The choice to use telephone booths as the main iconography is due to both the **instant international recognition** of the red booths as visual identity for the United Kingdom and the connection Edinburgh has to **historical architecture**. Several booths are located in the heart of the city, but go relatively unused, creating a unique opportunity to gain **invaluable real estate** during the festivals with instant visual recognition.

Telephone Booth Locations in Central Edinburgh

£1

The cost of adopting a
phone booth with BT's
"Adopt a Kiosk"
scheme

WHY TWITTER?

Twitter is one of the most used apps in the world, meaning an extremely **low barrier of access** for a massive market requiring **no new download**. By using familiar platforms, the trans-media performance can be introduced without worry of platform support availability or new technology adoption; **a seamless adoption**.

ACTOR WHO

Prototype

3D Scenario

Interactive System

Utilizing the TwitVid Web App, audition videos are uploaded to @ActorWhoEDI on Twitter

System Server: Laptop
Signal Input: Numeric Keypad
Audio Output: Telephone Speaker

Image Input & Upload

Audition videos will be uploaded automatically via a laptop camera and one external webcam.

Ringtone Trigger

Using an Arduino, distance sensor and speaker, the phone is programmed to ring when a person walks into the phone booth.

Working Prototype

UX Testing // Data Collection

More comfortable **sharing voice** but not facial video

Wished they could **playback** their audition and try again

“Don’t call us, **we’ll tweet you**” leaves you in anticipation

Wished there were different play **genres** available
